SCHULZE & PARTNER was founded in 1989.

We are an Industrial Manufacturers Agency mainly to the Heavy-Duty-, Steel and Automotive Industry and its System Suppliers.

We operate Europe wide through our own Subsidiaries / Sister Companies or with cooperating Partner Companies.

We are pleased to assist Manufacturers/Suppliers from Overseas in the European Market. This refers not only to market introductions of suppliers and their products, but also in helping to organize Joint Ventures, and cooperation's, finding potential partners or companies to buy; or simply to grow existing business.

We are accustomed to provide through our Group of Partners a complete Service, such as:

- ★ Introduction to our existing customers
- ★ Marketing of products to potential customers
- ★ Generating interest and enquiries
- ★ Engineering and production backup and support
- ★ Day to day issues such as deliveries/payments etc.

Our mission is to support Business who need a Presence for the purposes of Growing & Maintaining existing Business, Assisting in Technical Matters with Engineering and seek new Projects with Potential Customers in the Automotive and Heavy-Duty Industry.

Service

Consulting:

On the Automotive and Heavy-Duty Industry and its Suppliers.

Arrangement / Assistance:

with Cooperation's, Joint Venture Partnerships, Company purchases, winning new Customers, Marketing activities, Logistics, Rework and Sorting etc..

Training:

with Emphasis on Production and Finishing technology and the Products of the companies we present.

Product Introduction:

via Development and Design departments and Production Purchasing.

Coaching:

through all stages of Development and Design, Purchasing and Finance, Production and Quality, Planning and Administration.

Representation:

of contracted Principals in agreed markets or agreed Customers Europe wide.

Machine and Equipment Building:

from Concept to the completed installation of special machines, Automatisations Lines also as "lean concept", Transport and Handling systems, Testing equipment.

Tools and Moulds:

Die casting moulds and cutting tools, plastic moulds, stamping and sequent cutting tools.

Special fluids and Lubricants:

Environmental friendly, fire resistant Hydraulic fluid; Heavy-Duty Gear oils, Turbine- and Compressor oils, Fluid for water sensible areas like Off-shore, Harbor, Shipbuilding, equipment, Windmills etc., Lubricants

**1. Environmental friendly, fire resistant hydraulic fluid (EcoSafe ®)
Heavy-duty Gear Oils (EcoGear ®), Turbine Oils PAG´s special Greases and
Lubricants**

For the heavy-duty industry in general and its hydraulic systems, for big temperature ranges, by potential danger of fire,

- Metal producing, Rolling mills, Forging, Casting
- Heavy-duty- and mobile equipment for construction, tunneling and mining,
- Power plants (coal, hydro, nuclear), Wind mills
- Off-shore, ship building, harbor equipment, ship locks
- tested and released from all the leading hydraulic component producers

Advantages:

- 100% synthetic, Polyether polyol bases with complete saturated molecule structure
- Water free, hydrolytic stabil, no sludge and varnish, no asit formation
- Environmental friendly, readily biodegradable, non toxicity, WDC 1 (WGK 1)
- Very temperature stable, no thermal degradation, high viscosity index for a wide temperature range
- Seal material friendly, material compatibility, excellent lubricity and high performance
- long life time also under extreme conditions, very service friendly

**2. Special Machines, Automatisation Equipment, Assembly and Transport
Technology,
Handling Systems, Round Table Index Technic,
Staking Machines, Lock- and Key Production Machines,
Measurement- and Test Machines for Die-Cast- and Plastic-Injection-Molding
Tools**

Machinery for O-Ring, Seal and Snap Ring Assembly

- Concept and Design
- Software design
- Production controls
- CAD/CAM programming
- Arrangement from the concept to design and production to the final release
- special coated powder for softmagnets and high densified formed parts (up to 7,6)

3. Tools and Molds

- for diecast up to 40 to
- for plastic molds up to 6 to
- for stamping and segment cutting tools up to ca. 1 m

further services:

- Rapid prototyping in various technologies
- CAD/CAM production
- thermal- and flow analysis
- advising and coaching

4. Aluminum / Magnesium / Zinc / Castings for Production Parts being made in:

- Sand casting
- Gravity casting / Permanent molding and low pressure, bottom casting
- Pressure die casting, Squeeze casting,
- SSM / Rheo / Thixotropic/Vacural

We offer all Parts and Technologies also Rapid Prototyping, Samples, Design and Calculation, Tooling, Moulds, Measurement equipment that can measure and record during casting.

5. CNC Machining and Assembly

- all kinds and volumes and metals
- casted parts, forged parts

6. Molded Plastic Parts

in all common Materials, high-tech, glass fibre reinforced.

- with or without inlays
- multiple material techniques
- multiple color techniques
- clean room production for electronic and medicine parts also rapid prototyping, samples, tooling etc.
- with inner gas pressure

7. Formed sheet metal parts, Assembly

- Size up to 4 x 2,5m, Pressure force up to 1200 to
- Robotic controlled lines for sheet metal, welding and spot welding
- All kind of coating technology
- Prototyping and toolshop

8. Formed Parts

- cold / hot / orbital formed
in Steel, Iron, SS, Copper, Brass

9. Formed Powder Metal Parts (Sinter)

- formed parts
- softmagnetic parts
- special coated powder for softmagnets and high densified (up to 7,6) forms parts
- parts in stainless steel
